Under Pressure

We have supplied BlueDuct to several projects requiring a sealed pressure test. To this we say "...bring it on" as we have passed them all. This is very easy for BlueDuct and very difficult for our competition.

3.625" pressure

Zero Leakage

Verification

The contractor and owner's rep verifying the test with photos ... and, of course, the perfect shade of blue on that duct.

Disclaimer: Good luck trying this with PVC or fiberglass

In Stock:

We are increasing our stock to meet your 2014 orders.

LEED:

Let us know if you have a LEED project as we can cover the duct ends to meet the requirements of LEED. This job is about to leave for Chicago.
